

## Communication Services

Small to medium-sized businesses are usually the last to be offered new technologies and applications by traditional service providers. Not so with Summit Tech Partners. We are dedicated to providing these businesses with the reliable, simple and affordable solutions they need in order to be competitive today. We offer solutions for all growing businesses, no matter what service is currently in place. The reliability, affordability and expertise of Summit Tech Partners IP business solutions will make them an indispensable asset to any competitive smaller enterprise.

### VoIP

- Hosted VoIP Service - This service is perfect for new companies looking for an economical phone system, an existing company replacing an outdated legacy phone system, are moving and do want the expense of relocating their phone system, or are opening a satellite office.
- Trunking VoIP Service - A versatile and cost effective solution with the benefits of VoIP allowing your existing PBX/IPPBX/Key system and high speed Internet connection to work hand in hand for both voice and data. This solution is ideal for companies that have made a recent capital investment in a legacy phone system and are not in the market for a new phone system, but want to capitalize on the convenience of merging their broadband and voice services into one economical service.

### Traditional Telecommunication Services

- PBX/ Key systems
- POTS (Plain Old Telephone Systems)

### Broadband

- Dedicated T-1 service
